THAT'S WHY!

Freedom of design combined with high quality, fast delivery and environmental considerations are some of the keywords in ege's corporate philosophy.

Over the years ege has built up a unique expertise in developing carpet solutions uniting evocative individuality with high comfort. By the use of advanced technology only the imagination sets the limits, when carpet designs are created. This means that ege is capable of creating carpet solutions tailored to the individual client's wishes and needs.

With ege you get:

- complete freedom of design
- the opportunity to recolour and create special colours
- the world's most advanced plant for colouring of textile flooring solutions
- uncompromising quality from the cradle to the grave
- shortest deliverytime in business – including special design
- personal consultancy by competent design team
- local partners all over the world
- special orders down to one running meter
- products with a "green profile", e.g. BASTA and BRE
- products promoting a healthy indoor climate, e.g. LEED and Danish Indoor Climate Labeling
- products promoting good acoustics
- products with high security, e.g. fire and smoke resistance
- hard-wearing carpets with a high level of comfort
- permanently antistatic carpets
- anti-microbial technology e.g. for the healthcare sector
- carpets that can be disinfected e.g. for the healthcare sector
- barcode Econyl 70: carpets manufactured from recycled fibre contents
- felt modular backs without PVC and bitumen
